

High Power HiMid System - digitally powered **K 20 dp**

The construction principle of the high powered K 20 dp mid-high cabinet allows for flexibility of use in horizontal or vertical orientations. Optimised placement of the 2 x 10" / 1.4" drivers in relation to one another ensures a very precise phase and coverage characteristic. For installation applications, the universal MultiRigg™ be used to mount the system. Two different horn forms are available to better cover various sound reinforcement situations. The integrated amplifier electronics are based on Class D power amplifiers, which are controlled via particularly low-noise FPGA DSP processing. Various factory-configured presets and volume settings can be called up. Remote monitoring and control is carried out via the Ethernet interface using SEEBURG Network Manager. Signal transmission (AoE) in accordance with the AES 67 standard is also possible.

The K 20 dp features integrated digital amplifier electronics with a DSP controller (dp = digitally powered). Various factory-configured presets and volume settings can be called up directly on the box or via a network connection.

High-grade electronic components from the industrial sector and a first-class circuit design ensure excellent audio quality with low distortion and a minimal noise floor. Highly efficient and "intelligent" limiter systems ensure optimum protection against overload, without restricting the possibilities offered by this high-performance sound system.

 [Presets > Quick Start Manual](#)

Level

Adjustment in 3 dB steps
(-12 dB to +6 dB).

Status

Mute LED

Red light when the system is muted or under technically critical conditions.

Limit LED

Yellow light when the limiter is restricting the level.

Signal LED

Green light when the input signal exceeds -20 dBu

Power LED

Green light when the system is switched on.

Ethercon

Interface for remote control and audio transfer via ethernet (AES 67).

XLR

- Symmetrical analog input.
- Effective filter protection against HF interference and DC Voltages.
- Electronically balanced to prevent noise.

Presets

Flat

This setting provides a linear frequency response with a neutral sound characteristics. Standard setting for many applications.

High Boost

For use on long distances.

Boost

Similar to the „Flat“ preset, but with increased low end response.

Soft

Reduces the level in the frequency range from 2.5 - 5 kHz, to which the ear is particularly sensitive. This setting is recommended for high level reproduction of highly compressed music tracks.

Mode - key

Switches between control modes Status, Level and Presets.

Set - key

Setting of various values and Mute on / off.

Powercon (blue)

Power supply
~ 110-230 V / 16 A max.
